

Course Title: Continuous Insulation for Commercial Walls and Reducing Thermal Bridging

Provider: ICYNENE

AIA Provider Number: J329

Length of Program: 1 hour

Learning Units: 1 LU/HSW

Learning Objectives:

- Identify the types of insulation materials available for use in exterior CI applications
- Compare the cost impact of spray foam insulation as an insulation, air barrier and vapor retarder vs. multiple products to achieve the same result
- Evaluate building types and areas within the building where spray foam insulation can air seal and insulate more effectively than traditional insulation methods
- Identify the sources of thermal bridging in the building enclosure and the options for reducing
